

PROGRAM ACCESS 4.0

Thomas Haag (Lead Architect)
Hans-Jörg Kolbe (Head of SSQ Access4.0)
Robert Soukup (Head of Program)

LIFE IS FOR SHARING.

ACCESS 4.0

RECAP - WHAT DO WE WANT TO ACHIEVE?

WE DEVELOP A COST-EFFICIENT, LEAN-TO-OPERATE AND SCALABLE ACCESS PLATFORM TO DELIVER GIGABIT PRODUCTS.

WIN WITH (THE RIGHT) PARTNERS

- Business logic remains with DT
- Independence of single supplier's specifics
- True **DevOps** processes

REDUCE TIME-TO-MARKET

- One change per day (CI/CD)
- Open source / ecosystem to foster innovation

INCREASE AUTOMATION

- Decouple network scale and necessary effort
- Increased quality by improved testing (scope, scale)

ENSURE BOTTOM-UP PRICING / ALLOW FOR D2C

- Enable design-to-cost
- Open source as benchmark

ALL POWERED BY EDGE CLOUD AND READINESS FOR 5G

- CUPs enabled to cope with data scale
- Edge service at lowest possible costs

ACCESS4.0 – CURRENT SCHEDULE

- Software implementation architecture
- **√**:
- Mgmt layer leitstand io
- A4 POD provisioning (OS + K8s)
- SDN PAO Design
- VOLTHA 1.7 + 2.0 architecture
- SE Flex Routing, HQoS (Phase 1)
- Accounting (Phase 1)

- Full CI/CD integration
 - Automated testing
 - Inventory support for leaf, spine, OLT, ...
 - Provisioning of FTTH ONT serials
 - SDN for FTTH
 - In- and out-of-band mgmt network
 - QoS prototype

- POD-wide E2E automated tests
- Full information model
- Full inventory support
- Full observability
- SW upgrade procedure for network elements
- FTTH/FTTB support
- Partial LI support

- Full CI/CD with E2E tests (incl. Monkeys / fuzzing)
- Full high-availability (central and edges)
- Disaster recovery (central and edges)
- FTTH/B Retail and FTTH/B Wholesale fully supported
- Complete LI support
- Rollout procedures

Q4/2020

'TAKE-OFF'

June 2019
Release
'COOKIE DOUGH'

September 2019
Release
'DARK CHERRY'

December 2019
Release
'FGGNOG'

March 2020 Release 'FRENCH VANILLA'

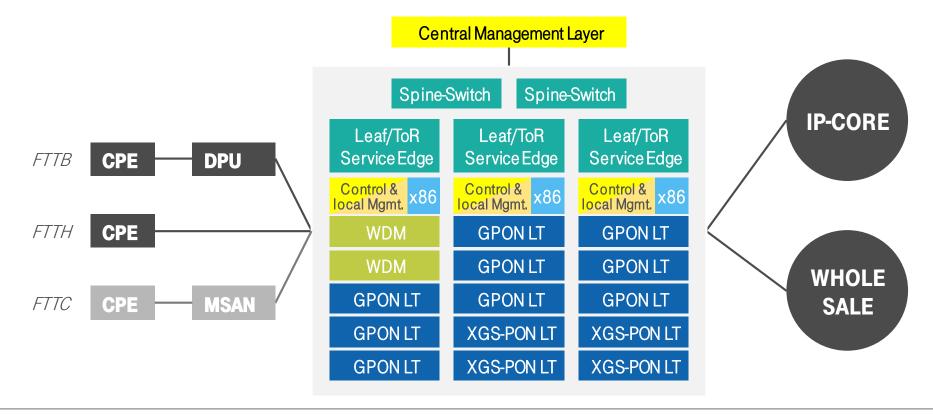

> Integration with OSS/BSS-IT stack (Planning, OS&R, Assurance, Fulfillment)

ACCESS4.0 IS A MINI DATA CENTER AT THE NETWORK EDGE

(AKA DT'S SEBA INCARNATION)

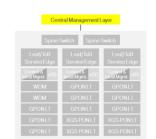

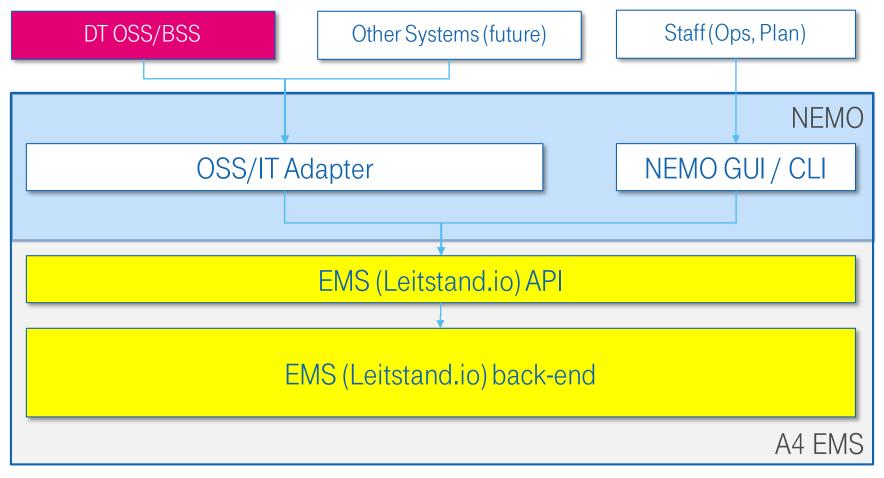

... BUT WHAT'S INSIDE? CENTRALIZED MANAGEMENT

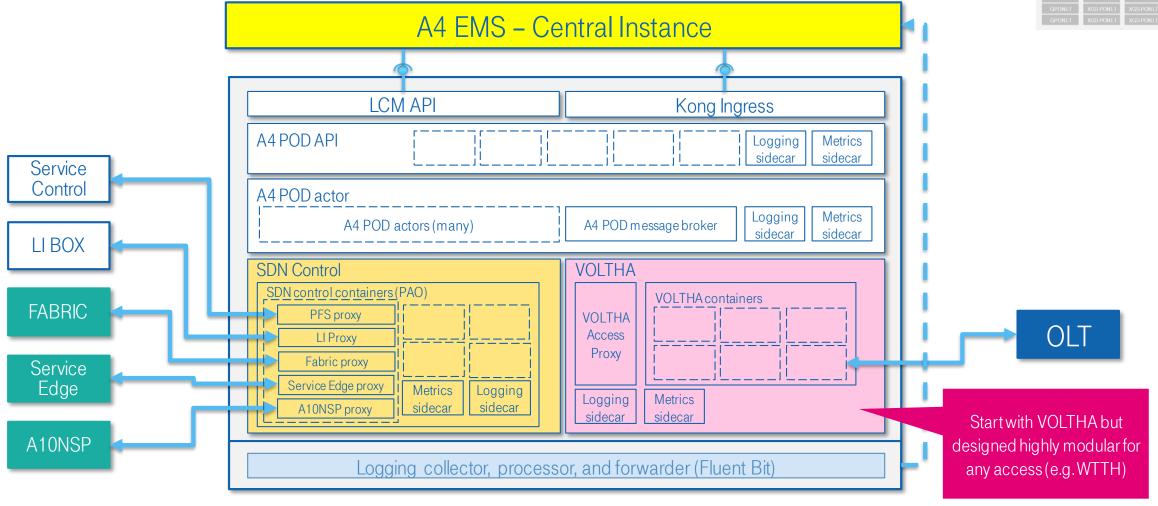

... BUT WHAT'S INSIDE? COMPONENTS & INTERFACES

ACCESS4.0 IS TECHNOLOGY BUT ALSO ABOUT CHANGE - SOME LESSONS FROM AN INCUMBENT NETWORK PROVIDER ©

- Working agile (e.g. according to Scrum) is pretty rigid (meeting cycle, roles, ...). 2-week sprints are tough especially for those, who are in touch with non-agile units → it's all worth the effort; we get real results quickly.
- Transformation requires the right partners > be strictly picky about the right one; rather postpone milestones
 - Scrum, SAFe, Nexus, ... require new roles, processes etc. → Benefit from coaches to help you to communicate and practice over and over ...

- Software Implementation Architecture, code guidelines, requirements documentation etc. are project guidelines

 → be bold & strict!
 - Code developed varies in quality

 → have empowered code maintainers inhouse
 - You can teach a network person IT, but becoming a software engineer is a different thing

 → establish a nucleus of true IT people

A4 PARTNER ECOSYSTEM FOR THE MVP FTTH/B

JUST THE BEGINNING

DEUTSCHE TELEKOM @ ONF CONNECT 2019
